Industrial Visit Report

Date of Visit: 11th January 2025

Location: Finolex Pipes, Urse, Maval Pune

Class: S.Y.Bcom (Second Year Bachelor of Commerce)

Institution: PCACS (Pimpri Chinchwad Arts, Commerce and Science College), Ravet

Department: Commerce

Teachers - Devendra M.Desai ,Mrs.Ispreet Kaur .

Students Participating: [18]

Introduction

On 11th January 2025, the second-year Bachelor of Commerce (S.Y.B.com) students from the Commerce Department of PCACS, Ravet, visited Finolex Pipes, located in Urse, Maval. The purpose of this industrial visit was to provide students with an in-depth understanding of the manufacturing processes, business operations, and industry practices related to the production of pipes.

About Finolex Pipes

Finolex Pipes is a prominent manufacturer of high-quality pipes used across various industries such as construction, water supply, and industrial applications. The company specializes in producing steel, plastic, and specialized pipes, ensuring that they adhere to international standards for quality and durability. With a commitment to technological innovation, Finolex Pipes plays a key role in the pipe manufacturing industry.

Objectives of the Visit

- To understand the step-by-step manufacturing process involved in pipe production.
- To gain knowledge about the quality control measures employed during production.
- To observe the role of technology and machinery in modern manufacturing.
- To learn about the organizational structure and operations of a manufacturing company.
- To understand the market dynamics and business strategies followed by a leading pipe manufacturer.

Activities During the Visit

1. Introduction to the Company:

- Upon arrival at Finolex Pipes, the students were introduced to the company's history, product range, and market position. A company representative explained the production process and the company's commitment to quality.

2. Factory Tour:

- The students were taken on a comprehensive tour of the factory floor. They observed various stages of the manufacturing process, from the selection of raw materials to the final packaging of finished products. This included an overview of extrusion, molding, and pipe testing procedures.

3. Quality Control Discussion:

- A detailed discussion on the quality control procedures followed at Finolex Pipes was conducted. The students learned how quality testing ensures that the pipes meet the required standards for durability, strength, and safety.

4. Departmental Interaction:

- Students interacted with the heads of different departments, such as production, marketing, and sales. This session provided insights into how these departments collaborate to achieve the company's goals and maintain efficient business operations.

○ Key Learnings

1. Manufacturing Process:

- Students observed the intricate manufacturing process, which involved the use of advanced machinery for extrusion, shaping, and testing. The role of automation in improving efficiency and consistency was emphasized.

2. Quality Assurance:

- The importance of maintaining high-quality standards was highlighted. Students understood the role of various quality control tests, which ensure that the pipes are fit for use in critical applications like water supply and construction.

3. Technology Integration:

- The visit showcased the integration of modern technology in the production process. Automation tools and modern machinery were shown to help streamline operations and reduce human error.

4. Business Operations:

- Students gained a better understanding of the day-to-day operations of a manufacturing company, including inventory management, supply chain coordination, and customer relations.

5. Market and Business Strategies:

- The visit helped students understand the competitive nature of the pipe manufacturing industry. They learned about the business strategies that Finolex Pipes employs to stay competitive, such as product diversification and technological advancements.

Conclusion

The industrial visit to Finolex Pipes was an enriching experience for the S.Y.Bcom students of PCACS, Ravet. It provided them with practical insights into the pipe manufacturing industry, as well as valuable knowledge about the processes involved in production, quality control, and business operations. The visit was a great opportunity for students to apply theoretical knowledge in real-world scenarios, enhancing their understanding of business and commerce concepts. Such industrial visits are essential for students to gain practical exposure and better prepare for their careers.
